PROFESSIONAL SUMMARY

Detail-oriented web developer and project coordinator with hands-on experience designing and delivering responsive websites and digital solutions for clients. Skilled at gathering client requirements, translating business needs into functional websites, coordinating project delivery, and communicating effectively throughout the development process. Comfortable working with HTML, CSS, JavaScript, GitHub, and modern web technologies, with a growing understanding of APIs, JSON, and business analysis principles. Passionate about solving business problems through technology and delivering high-quality remote client experiences.
